PROFILE

Former investment banking analyst that worked in Tech investment coverage, I bring strong technical problem-solving skills and thrive under pressure to meet internal and client deadlines. Committed to lifelong learning, I am eager to leverage my expertise and pivot into the dynamic tech sector as a Full-Stack Developer.

PROFESSIONAL EXPERIENCE

Analyst, Transactions (Tech), Delta Capita | Credit Suisse 02/2022 – 05/2023 | London, UK

- Assisted in the marketing and execution of M&A transactions in the European and APAC FinTech sector.
- Supported a project that used Python/Pandas to test discounted cash flow analysis vs the actual yearly outcome.
- Worked on a joint-venture buyout for a (£45m) per annum SaaS deal – used comparables and cash flow valuation, produced pitchbook materials and managed client and senior stakeholder interactions.
- Worked on a (£15m) FinTech mutualization project which acquired Post-Trade software and offered firms an upgraded software service back at a (£10m) per annum cost base reduction.

Analyst, M&A (Tech), Bitcoin.com 09/2021 – 01/2022 | London, UK

- Assisted with the acquisition and integration (£50m) of the FMFW Exchange.
- Produced investment materials and conducted analysis on daily trading volume of the exchange and various KPI's.
- Proactively researched investment opportunities within the blockchain sector.

Venture Capital Analyst, Osun Capital 01/2020 – 06/2021 | London, UK

- Received full time offer after 3 months, first intern to convert to full time role.
- Worked on the cross-border sale (£65m) of a FinTech payments app to a Nasdaq trading platform, produced management presentations, facilitated the due diligence process, and contributed to the financial modelling.

PROJECTS

BarHop 🔗

2 week product sprint in collaboration with 2 members using Ruby-on-Rails, HTML, SCSS, JS (Vanilla/Stimulus) and PostgreSQL.

- BarHop simplified the process of planning your evening by generating bar-crawl routes using user preferences.
- Integrated API to provide bespoke and real-time suggestions to enhance the user experience.
- Actively participated in pull request reviews and contributed to the collaborative development process on the BarHop GitHub repository, maintaining code quality and facilitating teamwork.
- Successfully deployed the web application to Heroku, ensuring accessibility to users.

Render

1 week product sprint, Co-developed a web application for renting artwork, in collaboration with a team of 3 members.

- Implemented the filtering and search feature, allowing users to easily explore the collection of artworks based on criteria such as artist and price.
